

# TikiWiki Editing Help

## Holocaust Wiki Project

### Editing a Page

To edit a page you have created or have permission to change, click on the **edit** button located in the top left-hand section of the text window.

### Creating and Linking Pages

Creating new pages in TikiWiki is very easy. There are two ways that this can be done.

1. If you see words with a ? next to it, all you have to do is click on the question mark and a new page will appear.
2. When making your branching simulation, you will create and link your pages by using the following code:

```
((group3-1B* | Choice B**))
```

\* This is the name of the link. You will use this format for each decision point link. You will not see this name. You will pre-label your Progression of Events chart with these codes.

\*\* This is the text that will be linked.

### Changing the Text

Title	--Title-- (a dash and equal sign on either side)
Bold	<u><u>Bold</u></u> (two underscores on either side)
Italics	''Italics'' (two apostrophes on either side – not a quote!)
Center	::Center:: (two colons on either side)
List	*list (unnumbered list - asterisk in front of each item)
	#list (numbered list – number sign in front of each item)
Line	--- (Three dashes)

### More Help

Click on the **Wiki Quick Help** link at the top of the textbox.
